## What were the Fund's costs for the year?

(based on a hypothetical \$10,000 investment)

| Ticker | Costs of a \$10,000 investment | Costs paid as a percentage of a \$10,000 investment |
|--------|--------------------------------|-----------------------------------------------------|
| UYM    | \$115                          | 0.95%                                               |

## How Did the Fund Perform Last Year?

Ultra Materials (the "Fund") seeks daily investment results, before fees and expenses, that correspond to two times (2x) the daily performance of the S&P Materials Select Sector Index (the "Index"). The Fund invests in financial instruments that the Advisor believes, in combination, should produce daily returns consistent with the Fund's investment objective. For the year ended May 31, 2024, the Fund had a total return of 41.07% and an average daily statistical correlation of over 0.99 to twice that of the return of the Index. For the same period, the Index had a total return of 24.59% and a volatility of 14.44%. The index performance was driven by factors such as a cyclical recovery following the pandemic. Primary factors affecting Fund performance include the total return of the securities and derivatives held by the Fund, the performance of the reference assets to which any derivatives are linked, financing rates paid or earned, expenses, transaction costs, the volatility of the Fund's Index (and its impact on compounding), and other miscellaneous factors.

## Value Based on a \$10,000 Investment\*

\* The line graph represents historical performance of a hypothetical investment of \$10,000 in the ProShares Ultra Materials from May 31, 2014 to May 31, 2024, assuming the reinvestment of distributions.
